IMPORTANT SAFEGUARDS

When using your L'EQUIP™ Model 110.5, please keep the following safeguards and precautions in mind:

- ✱ Before plugging or unplugging your power, please read all of the instructions.
- ✱ Avoid contact with any of the pliers or wiring parts.
- ✱ **Do not** put your fingers or other foreign objects, nor any of the motor's moving parts, in the feed tube. If only food pieces would be there, keep it in the feed tube, use the food pliers or an animal's head of foot or vegetable to push it down. If it's not possible to remove the problem with this method, turn the motor off and disassemble, take out or move the remaining food.
- ✱ To avoid slipping, wear the electrical shoes, **do not** use them for tasks in water or any other liquid.
- ✱ **Do not** operate any machine with a damaged cord or plug, or after the appliance malfunctioned or had a breakdown, or damaged in any manner. Send the appliance to the nearest authorized service center for a thorough examination, and any needed repairs, or identification of mechanical defect.
- ✱ Damage of other items can be caused by an incorrect use of the machine, or may cause fire, electrical shock or other injury.
- ✱ Unplugging from the cord can be when not in use, before assembling or disassembling and before cleaning.

- ✱ **Do not** immerse the machine in water. By pulling on the cord, the machine, plug, the plug, not the cord, and plug it into a standard outlet.
- ✱ Turn off all electrical before unplugging from an outlet, and plug it into a standard outlet.
- ✱ Always make sure the motor is powered down, fasten the machine, and the motor is turned on. **Do not** interfere with the motor's operation.
- ✱ Be sure to turn off the motor after every use of the pump. **Make** sure the motor stops completely before disassembling.
- ✱ Check up if there is a necessity when any animal is fed by or in the presence of children.
- ✱ **Do not** let children use the device or other accessories.
- ✱ **Do not** use outdoors.

■ SAVE THESE INSTRUCTIONS.

For More Information

Once you've read this manual and tried your L'EQUIP Model 110.5, you may still have questions. If you need additional assistance, please write us at: L'EQUIP, Inc., 555 Basler Avenue, Company #A-17043. Or call us at 777/307700, or e-mail us at www.LEQUIP.com.

Welcome to L'EQUIP, Inc.!

You're now the proud owner of L'EQUIP's™ Model 110.5. This juicer was designed with your convenience in mind — you will appreciate its ease of operation as you enjoy the delicious and healthy juices it gives you.

Introduction

The L'EQUIP™ Model 110.5 comes almost completely assembled in the box. To complete the assembly before its initial use, spring loose each side clamp by pulling out the bottom of each clamp, lift the cover, lightly press the blade/basket down into place and rotate with your fingers to make certain it is locked down and can move freely. Replace the cover, bring clamps up and notch over the cover, pressing in and down at the same time. You should hear a click, and clamps should be secure against the side of the juicer with no free play left. We suggest taking your juicer apart and washing the removable parts in warm soapy water before its first use. This will eliminate any traces of dust or residue from manufacturing or shipping. Washing these parts with any liquid detergent is fine.

Model 110.5

Assembly

Always make sure the juicer is unplugged before beginning assembly.

1. Place the juicebowl on top of the motor base. Guide ring located on the underside of the juice bowl should rest in accompanying guide slot on top of the motor base.
2. Set the blade/basket on the hub in the center of the juice bowl, and press down until it feels snug.
3. Gently rotate the blade/basket to ensure that it turns freely. If initially it failed to seat, this should slip it into place. Double check by pressing down and spinning it again.
4. Place the clear cover over the juice bowl with the large pulp ejection opening toward the back of the juicer.
5. Place the tops of the clamps on the respective slots on the cover, leaving the clamp hinges resting out. Press the bottom of the clamps in, until they snap snugly into place.
6. Place the pulp basket under the pulp spout behind the juicer.

Cleaning Your Juicer

- All parts are washable in warm soapy water except the motor base.
- Use any liquid dishwashing detergent. **Do not** use any products containing ammonia, bleach or scouring powders. These products will dull, scratch or mar the plastic surface.
- Disassemble according to instructions on page 6.
- To clean cover and juice bowl, use a soft sponge or dish mop. To clean blade/basket, invert basket assembly under faucet so that water passes through the outside to the inside. Use a scotch pad or soft brush to clean pulp from basket.
- Sponge off the motor base and legs underneath in case any juice has spilled under the juicer.
- After prolonged use, the cover, blade/basket assembly, bowl and plunger may start to show mineral deposits. To remove deposits submerge in a solution containing 1/2 cup of automatic dish washing detergent and a sink full of water overnight. Then rinse thoroughly.
- For your convenience, all parts, excluding motor base are also dishwasher safe, on top rack only.
- Any other servicing should be performed by authorized service personnel only.

Disassembly

Always make sure the juicer is unplugged before beginning disassembly.

1. Remove the clamps by bracing each thumb on the top or middle of each clamp...
2. ... and use one or two fingers to pull out the bottom of each clamp. Let the clamps hang from the sides by the lower hinges.
3. Lift up the clear cover from the juicer.
4. Lift off the juicebowl and blade/basket as one piece. These two pieces will then easily come apart for cleaning.

Juicing Tips

- ❖ For the best results while juicing fruits and vegetables, press slowly and firmly on food plunger at a steady rate.
- ❖ Trimming stalks and stems off of produce is recommended. It will make a less bitter juice.
- ❖ When juicing a combination of fruits or vegetables, feed the machine slowly between combinations of fruits or vegetables.
- ❖ Always try to select fresh, firm produce.
- ❖ Remember to always wash produce free of dirt and insecticides.
- ❖ Juice from fruits and vegetables should be consumed immediately after juicing, before oxidation occurs.
- ❖ For the best results for your health, we recommend to drink two or three glasses of fresh juice daily.
